

Prime Numbers is a DAO that generates funds for our community through NFTs and DEFI.

Prime Numbers are composed of Prime Numbers DAO & Prime Numbers Finance. Basically, Prime Numbers have different mechanisms to generate funds for the community.

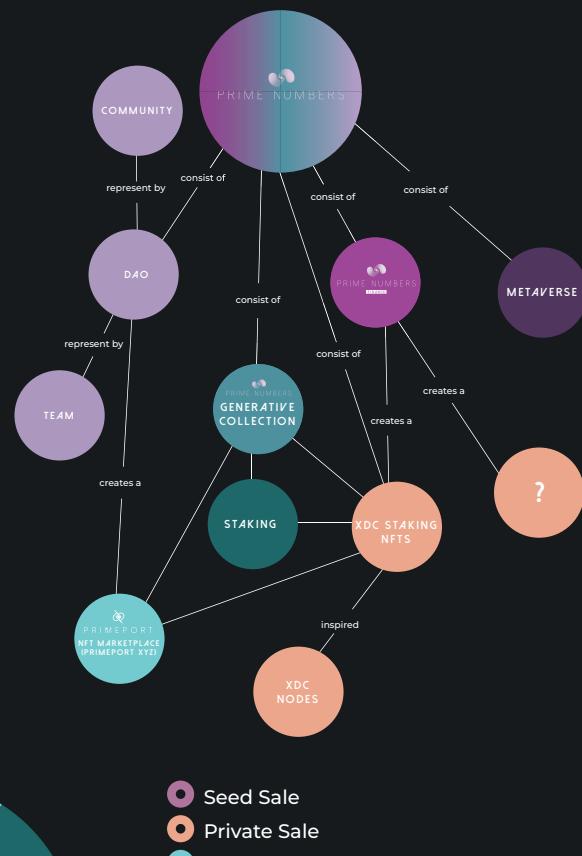

- Staking tokens inside NFTs: \$PRNT and \$XDC Staking.
- Profits from our Primeport.xyz NFT marketplace.
- Profits from our lending and borrowing protocol Prime Numbers Finance.
- Royalties from our NFTs collections.

However, It is much more than that. You could find an ecosystem based on DEFI and NFTs.

Prime Numbers Finance is the first lending and borrowing dapp on XDC network with Tokens and also NFTs implemented. XDC users will finally be able to earn passive income from interest paid on loans, without with thirdparties.

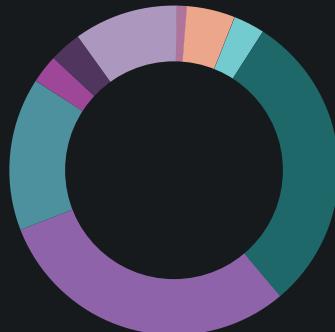

Primeport.xyz is a multichain NFT marketplace where you can trade all the NFTs from all the EVM networks.

# PRIME NUMBERS
